Injection 100 mg/mL

It's more than a program—it's **our promise** to understand **your needs**, listen to what matters most to you, and create meaningful **connections** along the way.

Once your doctor has prescribed NUCALA, we will help you to **understand** the medication coverage process, investigate **affordable options**, and **guide you** through moments that matter in your care.

Please see Important Safety Information on pages 3 and 4 and full [Prescribing Information](#), including [Patient Information](#), for NUCALA at [NUCALA.com](http://NUCALA.com).

## Approved Uses

NUCALA is a prescription medicine for the:

- add-on maintenance treatment of patients 6 and older with severe eosinophilic asthma. NUCALA is not used to treat sudden breathing problems.
- add-on maintenance treatment of chronic rhinosinusitis with nasal polyps (CRSwNP) in adults whose disease is not controlled with nasal corticosteroids.
- add-on maintenance treatment of eosinophilic chronic obstructive pulmonary disease (COPD) in adults whose disease is not controlled. NUCALA is not used to treat sudden breathing problems.
- treatment of adults with eosinophilic granulomatosis with polyangiitis (EGPA).
- treatment of people 12 years of age and older with hypereosinophilic syndrome (HES) for 6 months or more.

## Important Safety Information

**Do not use NUCALA** if you are allergic to mepolizumab or any of the ingredients in NUCALA.

Do not use to treat sudden breathing problems.

**NUCALA can cause serious side effects, including:**

- **allergic (hypersensitivity) reactions, including anaphylaxis.** Serious allergic reactions can happen after you get your NUCALA injection. Allergic reactions can sometimes happen hours or days after you get a dose of NUCALA. Tell your healthcare provider or get emergency help right away if you have any of the following symptoms of an allergic reaction:
  - swelling of your face, mouth, and tongue
  - breathing problems
  - fainting, dizziness, feeling lightheaded (low blood pressure)
  - rash
  - hives
- **herpes zoster infections** that can cause shingles have happened in people who received NUCALA.

Please see additional Important Safety Information on page 4 and full [Prescribing Information](#), including [Patient Information](#), for NUCALA at [NUCALA.com](http://NUCALA.com).

Nucala   
(mepolizumab)

**Before receiving NUCALA, tell your healthcare provider about all of your medical conditions, including if you:**

- are taking oral or inhaled corticosteroid medicines. **Do not** stop taking your other medicines, including your corticosteroid medicines, unless instructed by your healthcare provider because this may cause other symptoms to come back.
- have a parasitic (helminth) infection.
- are pregnant or plan to become pregnant. It is not known if NUCALA may harm your unborn baby.
- are breastfeeding or plan to breastfeed. You and your healthcare provider should decide if you will use NUCALA and breastfeed. You should not do both without talking with your healthcare provider first.
- are taking prescription and over-the-counter medicines, vitamins, and herbal supplements.

**The most common side effects of NUCALA include:** headache, injection site reactions (pain, redness, swelling, itching, or a burning feeling at the injection site), back pain, and tiredness (fatigue). Mouth/throat pain and joint pain have been reported with CRSwNP. Diarrhea and cough have been reported with COPD.
